

2019-2020 Arbiter Basketball Spreadsheet

Date must be in this format
"12/10/2017"

Time must be in this format
"07:00 pm"

The remaining columns all have dropdown boxes to the right of the cell. Click the dropdown box and scroll down to your choice of level, team, and site. (you should not type any info in any cell except for the date and time)

Date	Time	Level	Home-Team	Away-Team	Site	Sub-site

NOTE: If you have a team that is not listed please select "TBA" and list the game info on the return email and we will get it input to the database. Each sheet is geared to your region with last year's teams and sites. The sheets are set up to gather all games Mid-school through Varsity both boys and girls. The ideal situation would be for all games to be listed on one spreadsheet.

If you are a school that hosts four games in one night (i.e., two varsity and two sub-varsity), EACH GAME must have its own entry, inclusive of start time and site. For example, if you have JV boys and JV girls playing simultaneously, each game must have its own entry and the site should be stated. Do not put all four games on one line, as we won't know who is playing were and what their start times are.

Thanks for your help.
